

YOUR CHIPPY NEEDS YOU

We know. Your favourite Fish & Chips is getting more expensive, which isn't great when household budgets are under strain across the UK.

On our side, every single ingredient has rocketed in price, some by more than 100%, meaning we have no choice but to raise prices if we're going to survive.

In fact, 1 in 3 fish and chip shops may go bust in 2022, so we really value your support.

Thanks for your understanding and rest assured that the moment we can lower the prices again, we will. In the meantime, we appreciate your support of the British fish and chip sector, and thanks for being a loyal customer.
